How to remove NA from a vector Fist, you ask whether there is or not NA Then, you turn it around with !bad

```r
x <- c(1, 2, NA, 5, NA, 8)
x
```

```
## [1]  1  2 NA  5 NA  8
```

```r
bad <- is.na(x)
bad
```

```
## [1] FALSE FALSE  TRUE FALSE  TRUE FALSE
```

```r
x[!bad]
```

```
## [1] 1 2 5 8
```

complete.cases If gives you back a logical vector saying whether you have an NA or not

```r
v <- c(1, 2, NA, 5, NA, 8)
v
```

```
## [1]  1  2 NA  5 NA  8
```

```r
d <- complete.cases(v)
d
```

```
## [1]  TRUE  TRUE FALSE  TRUE FALSE  TRUE
```

```r
v[d]
```

```
## [1] 1 2 5 8
```
